- The chart refers to courses offered during the 2012-2013 school year and is not a cumulative or historical table. Courses completed in prior years may be acceptable for admission purposes. The chart is advisory only and is intended for information, particularly for high school educators.
- The chart reflects the common policies of Alberta's universities and private university colleges in recognizing courses taken in other provinces that are acceptable for admission purposes in lieu of Alberta 30-level courses. The information is accurate as of the revision date, but subject to change without notice. The chart is not exhaustive; only courses that are accepted in common by all 11 institutions are included. In addition, individual institutions may accept other courses for admission purposes. For further information on acceptable courses, contact the institution directly. Note: Athabasca University has an open admissions policy which does not require high school prerequisites for admission to the University. While accepted for admission purposes, these courses may be applied in different ways by the institutions. For further information on acceptance of out-of-province courses by Alberta's universities and private university colleges, please contact the appropriate institution. For contact information, please refer to Section III. For information on acceptance of out-of-province courses by other Alberta post-secondary institutions, please contact the institution's Registrar.
